All prices are recommended retail and include VAT at 23%

The prices and specifications contained within this brochure are for informational purposes only. Our design and development team are constantly working to improve all our products, therefore are subject to change without prior notice. Matrix Bathrooms & Heating cannot guarantee that the illustrations in our brochure are in all cases identical with goods supplied.

Please Note: Returns incur a strictly administered restocking charge, and opened products will not be accepted.

All sizes are in millimetres.

All Matrix shower enclosures, wetroom panels & bathscreens are now covered by XProtect Easy Clean Glass Treatment. This will help prevent the built up of soap, dirt & limescale thus helping the glass to be easily cleaned.

# MATRIX LED Mirrors

- IP44 rated
- CE certified.
- Zone 2 Certified.

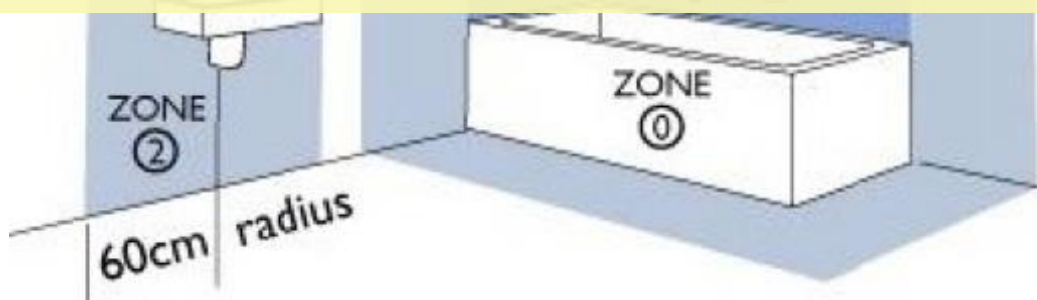

(Zone 2 is an area stretching 0.6m outside the perimeter of the bath and to a height of 2.25m from the floor. In this zone an IP rating of at least IP44 is required. In addition it is good practice to consider the area around a wash basin within 60cm radius of any tap as zone 2)

## Easy Plumb

Easy-Plumb shower trays are raised up on feet. This allows for easy fitting of the waste drain pipe. Since the waste drain pipe can be easily fitted under the shower tray, it can solve tricky installation issues that can arise due to the positioning of joists, etc.

Once the waste pipe is fitted and the tray installed, removable panels are then fitted.

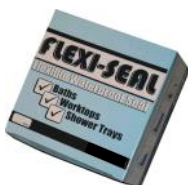

As these panels are removable, easy access to the drain pipe is possible.

The easy plumb system is available on all slim shower tray sizes.

(Stated sizes are +/- 5mm tolerance)

# OXYPIC

THE PROFESSIONAL ANSWER  
TO PROTECT BOILERS &  
CIRCULATING SYSTEMS

**STOPS LEAKS FAST!**

GUARANTEED TO SEAL LEAKS  
THEN CONTINUE TO WORK GUARDING  
AGAINST FUTURE LEAKS, SCALING AND  
RUST FOR OVER 50 YEARS

This is a watermark for the trial version, register to get the full one!

Benefits for registered users:

- 1.No watermark on the output documents.
- 2.Can operate scanned PDF files via OCR.
- 3.No page quantity limitations for converted PDF files.

**Remove Watermark Now**

Oxypic works to keep the heating system at maximum efficiency year after year, it works against corrosion, it seals leaks, it expels air from the water as it circulates, it stops the oxygenative. Oxypic also continues to circulate in the water to seal any potential leaks, it is used to water which of several complex additives. Oxypic is the only product on the market which also contains a corrosion inhibitor. It is used in new heating installations when filling up for the first time, it is used in existing systems to seal any undetected small leak. Leave Oxypic in the system to make it leak proof, rust proof, scale proof. It has no adverse effects on the system and gives a protective coat to all internal parts, to guard against rust and build up of oxide sludge.

Oxypic is black/brown in colour derived from a blend of alkalis, tannins, polymers and mineral formula. It may look better if it were lighter in colour, but it would not be as efficient. Once in the heating system you cannot see the colour of it and it works better.

Oxypic seals leaks in all metal boilers and pipework including threaded joints, it must be understood however that the metal itself must be of sufficient substance for the Oxypic to make the repair. It will therefore not repair leaks in boilers or pipework worn thin with age.

Oxypic will also seal leaks on plastic pipework according to tests made over a reasonable period of time. However we cannot yet give an unconditional guarantee on plastic pipe work. If you do have a problem on plastic pipe-work please contact.

**...And after OXYPIC seals the leak,  
it continues to work expelling air  
from the water and reducing boiler  
noise - thereby guarding against  
any future leaks, scaling and rust.**
